MAIA Early Adopters Program email list add request

Please send the completed form to MAIAEAProgram@jpl.nasa.gov.

Name:

Institution/Affiliation:

Title/Position:

Email address:

Organization type:

    Academia

    US Federal Government

    US State/Local Government

    Non-US Government

    Nonprofit

    Commercial

    Other:

MAIA target area(s) of interest (please check https://maia.jpl.nasa.gov/investigation/#target_areas):

Your interest in the MAIA project (<100 words):

Your NASA Earthdata username:

Note: This is needed to grant you access to the latest version of MAIA Simulated Data through NASA Earthdata Search. Accounts are free to create and use; sign up at https://urs.earthdata.nasa.gov/users/new if you don't have an existing account.

Have you read the Early Adopter Program guidelines on the following page, and do you agree to them?

MAIA Early Adopter Program Participation Guidelines

A note about MAIA Simulated Data Products

The MAIA Simulated Data Products are the result of pre-launch software tests and research with other data sources that can be used as proxies for MAIA data. These products are available to MAIA Early Adopters, with the goal of facilitating the use of MAIA data post-launch. Early Adopters can determine whether the MAIA products contain the information needed for their work, and begin development of any code, tools, or procedures needed to integrate MAIA data into their workflow. Early Adopters can also provide feedback on the accessibility and usability of the MAIA data (obtaining the products, formats, content, available tools and user resources), which the MAIA team hopes will result in better products and greater use of MAIA data, as well as better outcomes for the Early Adopters.

The MAIA Simulated Data Products are made with training data, including existing satellite data, chemical transport data output, and surface monitor data. The performance and accuracy of the Simulated Data is not intended to be representative of the production MAIA data. If you decide to use MAIA Simulated Data in research or publication, please ensure you have a complete understanding of the dataset(s) and their intended use.

Benefits to Early Adopters:

- You will receive access to the latest version of the MAIA Simulated Data Products
- You will be invited to MAIA Early Adopter workshops in order to learn about mission progress, target areas, and Simulated Data Products, as well as occasional notifications about other events that may be useful to MAIA Early Adopters
- You will be invited to present on your intended use of MAIA data and/or use of the Simulated Data Products at MAIA Early Adopter Workshops and, pending time availability, at Science Team Meetings
- Once MAIA has launched, you will receive updates on the progress of regular data product production and be invited to the short courses, workshops, and tutorials organized by the MAIA team
- If you have questions about MAIA that cannot be answered by the MAIA applications representative, you will be put in touch with the appropriate NASA MAIA Science Team member

Expectations of Early Adopters:

- We ask you attend (in person or via remote access) at least one MAIA Early Adopters workshop to provide feedback on the Simulated Data Products and other MAIA topics
- We may ask you to provide a one slide summary of your use of the MAIA Simulated Data Products/intended use of MAIA data up to twice a year to support reporting on the MAIA Early Adopters Program to NASA Headquarters
- We ask that you be available to answer questions from the MAIA team on your intended use of MAIA data, in order for the MAIA team to better understand your needs
